

## 2 - Biomass Feedstock

RM 8495 and 8496 are for use in studies of the properties of fibers and paper sheets. Each RM is characterized for selected pulp characteristics (Lap Sheet, Handsheet, Fiber Analysis, Fines, and Chemical composition, PFI Beating curve and Tappi standard). See Report of Investigation.

PLEASE NOTE: The tables are presented to facilitate comparisons among a family of materials to help customers select the best SRM for their needs. For specific values and uncertainties, the certificate is the only official source.

### 2(2)- Biomass Feedstock

SRM	Description	Unit Size
8495	Northern Softwood	10 sheets
8496	Eucalyptus Hardwood	10 sheets
